

Windermere Station Gateway

Station Option 2

This option creates a new station building on the southern edge of the site. It would create a clearer station entrance, a more open space outside the station, and a large covered area with seating and cycle facilities.

1 Station Building

A new, larger station building in this location would allow for more seating, WC's, and waiting space.

Floorspace area: 166m²
› Existing: 74m²

2 Canopy

A large covered area would provide shelter, seating and flexible space for different uses.

Canopy area: 211m²
› Existing: 20m²

3 Forecourt

A larger, more open public space would provide a clearer welcome, with planting, seating and signs.

Forecourt area: 776m²
› Existing: 508m²

4 Seating

More seats would be provided across the station area to make waiting more comfortable.

Number of seats: 28 no.
› Existing: 10 seats

5 Access & Movement

Parking and drop-off areas would be simplified to improve safety and make the station easier to use.

6 Cycling

A new cycle hub would be built into the canopy area.

Which parts of this option do you like most and why?
